

CERTIFIED COIN DEALER newsletter

Vol. I No.3

August 22, 1986

Single copy price \$3.50

Introducing the CERTIFIED COIN DEALER newsletter

There has been a growing need for specific independent information on pricing for certified coins. It would be monumental and voluminous to attempt to report every company that certifies coins, with every grade and price. The purpose of the Certified Coin Dealer newsletter, which is published by the Coin Dealer Newsletter, is to report the highest bid prices for certified coins by series, grade, and certification company. We will report the active areas and the most active grading services.

There are currently three grading services which receive the majority of the buying and selling recognition on teletypes, in auctions, at coin shows, and on dealer buy/sell lists. They are ANACS (American Numismatic Association Certification Service), NCI (Numismatic Certification Institute), and PCGS (Professional Coin Grading Service). There are however, many other competent grading services which are not as widely used. If any of these other companies should become as widely accepted by the dealers as the three best known, or, if any other new services are formed which are widely accepted, the CCDn will report their prices.

Although we have been writing the CCDn, in house only, for a couple of months now, this is the first issue for publication. This was done in order to iron out the rough edges and fill in as many bids as are available today. In some columns you will notice an "NB". This means there is *no bid* available at this time. Many of these should fill in rapidly as bids are found.

ALL PRICES ARE DEALER BIDS. These bid prices will actually represent what some dealers or even just one dealer will pay for a specific coin if the quantity is representative of the market for that particular issue and grade. Grades listed for each service are very flexible, in that, if a specific grade is not receiving enough action, it may be removed and another area which is active, will be substituted.

We are reporting to you what the highest bid is for a particular issue. We will not list a sell or ask price as all dealers work on a different percentage markup. Every dealer is entitled to pay whatever he wants in relation to the bid price. Unless, of course, he has a guaranteed buy-back, then he may be under a legal obligation. Nevertheless, not every dealer will pay the bid price; the majority will always pay a percentage of bid depending on their own market. This fact is the same as represented in the CDN. Not every dealer has the same need. If one wants the average buy price, ask the average dealer. If one wants to know the highest consistent buy prices: it's Bid.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$21. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than seven graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 40 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, and full head on Standing Liberty quarters. PCGS has an established grading set for the major series.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

DO YOU KNOW HOW THE PRICING STRUCTURE VARIES ON CERTIFIED COINS? YOU CAN NOW!!!

The *Certified Coin Dealer newsletter*, published by the Coin Dealer Newsletter, introduces its newest price guide on wholesale levels of ANACS, NCI, and PCGS coins in various grades of Mint State and Proof.

The *CCDn* reports the highest known bids of actively traded coins, which have been certified by ANACS, NCI, and PCGS. At this time, the coins from these three grading services are the most widely traded.

The prices shown in the *CCDn* are based upon data from all major market makers in the certified coin segment. The publishers of the *CCDn* do not buy, sell or trade coins. In short, there are no persuasive forces that might distort the true market picture.

Since the early 1960's the "Coin Dealer Newsletter" has been America's #1 wholesale numismatic price guide. The same publishers now present America's premiere wholesale price guide for certified coins – a compilation of pricing data on all actively traded certified coins.

For a limited time only, you can order the *Certified Coin Dealer newsletter* at a special price. Subscribe today and get the most comprehensive price guide on the certified coin market.

Get in on the Ground Floor

DELAWARE VALLEY COIN & STAMP CO. INC. WANTS TO HELP YOU GET IN ON THE GROUND FLOOR of a coin market that offers some of the most exciting possibilities that we've seen available to the buyer in a *long* time. These opportunities exist with coins that have been graded by the Professional Coin Grading Service (PCGS). PCGS's accurate grading and "sight unseen" bidding network means that you can now buy coins with more confidence than ever before. We're also very excited about the new *Certified Coin Dealer Newsletter* because you can now track the performance of PCGS coins much more easily than ever before. We've been observing the PCGS market very closely. In our opinion, all of the necessary components are there for the market to go from the ground floor all the way to the top!

If you agree with our observations and want to take advantage of the opportunities that exist in the market, we're ready to assist you in any way that we can. We will custom design a portfolio of PCGS coins to meet your own individual needs and goals. Here's a small sample of PCGS coins that we have available for sale:*

1881 Shield Nickel Proof 64 \$1750	1929-S Buffalo Nickel MS 65 \$1000	1861 Seated Half Dime Proof 64 \$2250
1842 Seated Dime MS 64 \$2250	1937-D Walking Half MS 65 \$1750	1889 Morgan Dollar MS 65 \$1200
1935/34 PDS Boone Set MS 65 \$4200	1936 Norfolk Half MS 65 \$1100	1922 Grant No Star \$1 MS 64 \$3300
1907 \$2½ Liberty MS 64 \$3350	1911-D \$2½ Indian MS 64 \$6600	1901-S \$5 Liberty MS 64 \$3600

*Prices subject to change.

Give us a call at 1-800-345-8188, if you are interested in these coins, as we expect them to sell very quickly. If you would like us to personally assemble a portfolio of PCGS coins for you, fill out the coupon below and mail it in as soon as possible. Get in on the ground floor!

A UNIQUE OFFER FROM DVCS:

Any client who purchases a PCGS portfolio of \$2,500 or more from us will receive the next 52 issues of the *Certified Coin Dealer Newsletter* (a \$99 value) with our compliments. This offer expires December 31, 1986.

Dear DVCS:

I WANT TO GET IN ON THE GROUND FLOOR!

- ☐ I wish to purchase a portfolio of PCGS coins. Enclosed is my check for [] \$2,500 [] \$5,000 [] _____. Please have Frank Greenberg call me to discuss my personal portfolio.
- ☐ Please add my name to your PCGS mailing list.

CERTIFIED COIN DEALER

newsletter

Vol. I No. 1

September 5, 1986

Single copy price \$3.50

U.S. Gold Most Active Of All Series

While reflecting over the response from CCDn's initial issue, subscribers reminded us that they would like to keep a complete run of newsletters. Since our first published issue was Vol. I No. 3, a gap would appear from the start. Therefore, we will treat the initial issue as a skeleton and make it complimentary to our readers. This means that our inaugural issue is in hand and dated September 5, 1986 (Vol. I No. 1). Current subscriptions have begun with this issue.

All prices listed are actual dealer bids. To be recognized, bids must be representative of normal quantities for a particular issue. On this basis, bids may be volatile from week to week as the higher buyer drops out and the next in line now becomes the high buyer. Or, if a new higher buyer gets a large order, bids may jump markedly.

As dealers are making bids, more prices are being updated in areas which previously showed no bids. As dealers begin to make markets in these areas, we will make this information available to you. As of now, some series may not have enough coins graded by a particular service to reflect actual bid levels.

Certified gold coins are leading the market at this time. ANACS, PCGS, and NCI graded coins are extremely popular at current bids with many issues having undergone strong advances (MS-63 thru MS-65). One area which showed the most substantial gains recently was for NCI gold. Bids are higher in the majority of issues. This can be somewhat misleading since NCI bids were previously based on a percentage of CDN bid. Now that dealers see actual bids listed for NCI, they realize their buy prices are substantially higher and are making them more readily apparent.

ANACS and PCGS gold is not being ignored by a long shot. Many dealers have standing orders for variously graded coins and will pay at least current bid levels, and if a sizable lot comes along that contains enough of the right material, they will pay in advance of their current buy prices.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

There have been tremendous adjustments downward in some areas of dollars, walkers, and commems. MS-64 and MS-65 common dates (even some not so common dates) continue to lose ground as supplies saturate the market and dealers lower their buy prices. Yet, there is renewed strength for the most common MS-64 and 65 Morgan dollars as bid levels begin to inch back up. Support for MS-64's is now in the \$230+ range, while MS-65's move upward near \$500. And, although walkers and commems are considerably lower, demand is still quite apparent.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$21. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than seven graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 50 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, and full head on Standing Liberty quarters. PCGS has an established grading set for the major series.

CERTIFIED COIN DEALER newsletter

CERTIFIED COIN DEALER newsletter reports the national coin market for the month of January. Only the most active areas for the month are graded and services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bid at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

Vol. I No. 2

September 12, 1986

Single copy price \$3.50

Walkers, Commems Rebound, U.S. Gold Remains Hot!

Generally speaking, Walking Liberty half dollars and commemoratives, from all three grading services, are back on the upswing. Prices have edged forward for many issues as dealers are attempting to satisfy client want lists. Walkers had a shortlived downturn on the cycle as sellers became more active than buyers. However, quantities were quickly absorbed as buyers became more aggressive at today's levels.

Commemoratives, on the other hand, have been falling for a few weeks and much more dramatically. Many issues had declined as much as 30%-40%. Apparently, some dealers now feel this presents a very good buying opportunity at what might be called discounted levels of only one month ago. One has to remember that mintages are quite low with respect to most other series. When comparing MS-64 and better quality to other series, one will find that an even smaller percentage of the total mintage will qualify. This fact lends well to the future of the whole commem series. Add to this the continuing education of collectors and investors, which has been brought about by the Society for U.S. Commemorative Coins and one can see why the popularity of this series is flourishing.

The U.S. gold market is enjoying an extreme amount of activity at this time. There may not be many changes, but the overall solidity of the bids is unchallenged. Many dealers are willing to buy most issues at the current bid levels. The most actively traded coins are twenty dollar gold pieces, both Libs and Saints. In MS-63, \$20 Saints will command at least \$1,110 in PCGS holders, while ANACS coins will bring \$1,050. Libs will fetch \$1,450-PCGS and \$1,400-ANACS. There have been a couple rarities offered for sale. PCGS 1887 \$1 Gold PR-66 \$11,500.

PCGS 1932 \$20 Gold MS-65 \$35,000.

The most common date dollars are quite stable at today's levels with many dealers actively buying coins. The 1881-S is wanted at \$215-PCGS and \$200-ANACS, in MS-64. In MS-65, the 1881-S has strong support at \$475-PCGS and \$425-ANACS. The other common "S" mints are in demand at somewhat higher levels. Rarely encountered MS-67 specimens occasionally find bidders hoping to buy. So-called common "S" mints are wanted at a minimum \$2,000, Peace \$'s at \$1,900, and Carson City \$'s at \$2,600. These bids are for PCGS coins.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$21. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than seven graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 50 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, and full head on Standing Liberty quarters. PCGS has an established grading set for the major series.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

Individual buy and sell prices will vary from dealer to dealer. What price we, an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

CCDn does not buy sell coins whatsoever. CCDn does not recommend any particular dealers. B/L p...
are represented as authentic to the CCDn nevertheless CCDn implies no guarantee whatsoever

DO YOU KNOW HOW THE PRICING STRUCTURE VARIES ON CERTIFIED COINS? YOU CAN NOW!!!

The *Certified Coin Dealer newsletter*, published by the Coin Dealer Newsletter, introduces its newest price guide on wholesale levels of ANACS, NCI, and PCGS coins in various grades of Mint State and Proof.

The *CCDn* reports the highest known bids of actively traded coins, which have been certified by ANACS, NCI, and PCGS. At this time, the coins from these three grading services are the most widely traded.

The prices shown in the *CCDn* are based upon data from all major market makers in the certified coin segment. The publishers of the *CCDn* do not buy, sell or trade coins. In short, there are no persuasive forces that might distort the true market picture.

Since the early 1960's the "Coin Dealer Newsletter" has been America's #1 wholesale numismatic price guide. The same publishers now present America's premiere wholesale price guide for certified coins – a compilation of pricing data on all actively traded certified coins.

For a limited time only, you can order the *Certified Coin Dealer newsletter* at a special price. Subscribe today and get the most comprehensive price guide on the certified coin market.

Vol. I No. 3

September 19, 1986

Single copy price \$3.50

Prices Mixed, Market Moving in Positive Direction

Judging by the number of subscriptions we receive on a daily basis, the "Silent Majority" is no longer keeping quiet. More and more dealers have been demanding updated *independent* price information on certified coins. With the Certified Coin Dealer newsletter that's just what you get. The certification services are a result of the confusion that has transpired over the last decade concerning grading and, therefore, pricing. The dealers may not have been confused, because they are professionals and know what they want to pay for a specific coin. Even the collector may not have been confused, because most of them are students of numismatics and study the particular series in which they have interest. However, as the investor has become a major force in the last ten years, his confusion over grading forced certification services into business. And his gullibility keeps some of the underqualified services in business. Yet, there are many fine grading services. (Check them out as you would any company you wish to do business with.)

Amid all this confusion, a solution has been found. But, the true test will be the consistency that should be established over the coming years. If grading can remain truly consistent, then this once collector-dominated hobby can rightfully become a viable collector/investor industry with a promising future.

Commemoratives: MS-63 commems appear fairly stable, although a few issues fell this past week (ANACS & PCGS). On the other hand, a number of MS-64's and MS-65's from all three services have increased this week.

Dollars: The dollar market remains mixed as several dates continue to fall in MS-63 thru 65. However, the most common dates are solid at current levels. A few rare dates have seen increased bidding, such as, 1883-S, 84-S, 89-CC, 93-O, 94-P, 96-O, and 1901-P. These are virtually impossible to find in true MS-65. Active buyers can be

found for MS-66 & 67 PCGS coins at \$1,100 and \$2,000, respectively. A recent ANACS 1893-S dollar, in VF-20, was offered at \$1,300.

Type Coins: Changes in mint state type were minimal, but mixed. Changes could be found in both directions in most grades. Proof type seems to be a little more active at higher levels than mint state.

U.S. Gold: This is still the most active area of the market. Price changes can be found under each grading service. For the most part, levels have increased with just a few adjusting downward. Most dealers are doing the majority of their business in gold at this time. And if this continues, it will have a positive effect on the rest of the market.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$21. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than seven graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 50 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, and full head on Standing Liberty quarters. PCGS has an established grading set for the major series.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

Early MS-65 Mercury Dimes In Strong Demand

If price increases are an indication of a warming market, and they usually are, then watch out for MS-64 dollars because they've turned hot overnight. At least one marketmaker has raised his buy prices 10% to 50% for a majority of the dates. Of course, he only wants "sight unseen" PCGS coins or "raw" unpapered (that is to say, he will buy accurately graded MS-64's, in or out of plastic), coins at these levels. Whether other dealers will soon follow or just sell all their MS-64's to the bidding leader, we shall soon find out. These price increases will naturally have an influence on ANACS and NCI graded dollars because most dealers (those dealing in these papered coins) base their buy prices on a specific percentage of CDN bid.

Common date MS-65 dollars are stable at current levels with many dealers participating at these levels.

Early Mercury dimes, 1916 through 1929, are gaining much of the limelight lately as several dealers try and buy all coins that fall into the MS-65 category. Upon checking with some dealers it is noted, even though their buy prices have increased substantially, they are not receiving near as many coins as they need for their clients. Part of the problem could be that some dates have not been graded by the certification companies yet, however, some dealers will take properly graded 65's without papers at their higher buys. Some of the later date mercs have adjusted down (1941-45) in MS-64 and 65 FB.

Although changes are not as plentiful this week for U.S. gold coins, this area of numismatics is very solid at today's levels. The most consistent and tightest spread issue is the \$20 Saint Gaudens in MS-63 and MS-64. PCGS coins trade between \$1,175 to \$1,200 in MS-63 and \$2,350 to \$2,400 in MS-64. ANACS coins continually trade between \$1,100 and \$1,150 in MS-63.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

Many dealers feel type coins are a good deal at this time. The problem is, this area lacks the leadership of one or two marketmakers to make things happen. The majority of the changes in mint state coins are lower slightly, while some proof coins are up very little. Those that seem to consistently receive higher bidding are the issues with low mintages, but, the likelihood of locating many coins is quite slim.

Modern proof singles remain active at current levels. More dealers are beginning to get involved in these areas with some even looking to buy PR-62 quality issues. Recent activity finds bids for PR-62 Buffalo nickels and Franklin halves (1950-53).

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$21. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than seven graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 50 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, and full head on Standing Liberty quarters. PCGS has an established grading set for the major series.

(

CCl₄ (anhydrous) and γ -butyrolactone (GBL) were reagent grade and used without further purification. CCl₄ was distilled under reduced pressure and stored over calcium hydride. GBL was distilled under reduced pressure and stored over calcium hydride.

DO YOU KNOW HOW THE PRICING STRUCTURE VARIES ON CERTIFIED COINS? YOU CAN NOW!!!

The *Certified Coin Dealer newsletter*, published by the Coin Dealer Newsletter, introduces its newest price guide on wholesale levels of ANACS, NCI, and PCGS coins in various grades of Mint State and Proof.

The *CCDn* reports the highest known bids of actively traded coins, which have been certified by ANACS, NCI, and PCGS. At this time, the coins from these three grading services are the most widely traded.

The prices shown in the *CCDn* are based upon data from all major market makers in the certified coin segment. The publishers of the *CCDn* do not buy, sell or trade coins. In short, there are no persuasive forces that might distort the true market picture.

Since the early 1960's the "Coin Dealer Newsletter" has been America's #1 wholesale numismatic price guide. The same publishers now present America's premiere wholesale price guide for certified coins – a compilation of pricing data on all actively traded certified coins.

Subscribe today and get the most comprehensive price guide on the certified coin market.

Dealers View Long Beach Convention As "Bellwether"

The Long Beach Coin Show is usually a significant barometer by which to measure the strength of various markets over the near term. This week's convention will be no different. The country's most active buyers and sellers will be together and in a short time span the market will reveal the strengths and weaknesses of itself.

One year ago, the majority of showcases at any major show contained almost all non-papered coins. The dealers who dealt in certified coins were, although serious, looked upon by others as a sort of novelty. Well, this has all changed now. Most showcases contain lots and lots of certified coins. Not only from ANACS, NCI, and PCGS, but others, as well; like PNG and INS. Both well respected, yet, not visibly traded in large enough volume by the dealers to enable pinpoint pricing on a consistent basis.

Anyway, it is obvious that marketing strategies are changing. Although most collectors dislike the commercialism involved with the changes, the industry is taking on a more professional atmosphere. Besides, the true collector can ignore the "certs" and still admire the coin with the added confidence that there are buyers out there, at some level, for these coins graded by the major services.

Commemoratives in MS-64, 65, and 66 are quite steady at current levels, in fact, owners of MS-66 and better issues can name their own price as buyers are very willing to sock away these rare gems. The slightest weakness can be found in MS-63; but, this occurs for just a few issues and changes are nominal.

The majority of MS-64 silver dollars are higher (ANACS and NCI) as available supplies are anything but plentiful. The Long Beach Show should determine the strength of 64's. MS-65's also seem to be in demand at current levels. Several dealers are looking for most Peace dollars in MS-64 at today's bids.

Mint state gold continues very strong with most dealers more active in PCGS certs than others. The advantage PCGS dealers have, moreso than non-PCGS dealers, is that they know the quantities of coins that have been graded within a particular series in each specific grade. Of course, in the upper grades, U.S. gold is easily saleable as quantities are strictly limited.

Buffalo nickels, Mercury dimes, and Walking Liberty halves are all fairly active at current levels, with Mercs extremely popular in MS-65. Full-bands are not required for today's bids, just gem quality.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$21. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than seven graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 50 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, and full head on Standing Liberty quarters. PCGS has an established grading set for the major series.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

Certified Coin Dealer newsletter reports the national coin market for certified coin dealers. Only the most active areas for the month are highlighted. It gives a representative CCDn dealer's view of the market. To insure accuracy and completeness of the data, we have chosen the highest known bid prices at press time and they are based strictly on dealer needs. Prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price level an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

DO YOU KNOW HOW THE PRICING STRUCTURE VARIES ON CERTIFIED COINS? YOU CAN NOW!!!

The *Certified Coin Dealer newsletter*, published by the Coin Dealer Newsletter, introduces its newest price guide on wholesale levels of ANACS, NCI, and PCGS coins in various grades of Mint State and Proof.

The *CCDn* reports the highest known bids of actively traded coins, which have been certified by ANACS, NCI, and PCGS. At this time, the coins from these three grading services are the most widely traded.

The prices shown in the *CCDn* are based upon data from all major market makers in the certified coin segment. The publishers of the *CCDn* do not buy, sell or trade coins. In short, there are no persuasive forces that might distort the true market picture.

Since the early 1960's the "Coin Dealer Newsletter" has been America's #1 wholesale numismatic price guide. The same publishers now present America's premiere wholesale price guide for certified coins – a compilation of pricing data on all actively traded certified coins.

Subscribe today and get the most comprehensive price guide on the certified coin market.

Dealers Take Positive Approach Toward Current Market

The results of the Long Beach Coin Show must be viewed as very positive for the entire industry. The majority of dealers reported having very good shows. Most of, if not all, the major dealers are making some kind of market in certified coins. Several dealers will even pay more than their listed bids for coins they feel have extra eye appeal for the particular grade. This is the little "extra" that some dealers are doing for their clients; selling them *select quality* certified coins.

One of the concerns some dealers felt as they approached the Long Beach Show was an overabundance of certified coins coming on the market—mostly PCGS coins which have been massively backlogged for some time now. Well, this did not come to pass, as many dealers were scrambling around the show for the available supply. It was interesting to see bids move as buyers and sellers tried to get together. Sometimes the difference was as little as five dollars per coin on \$300 coins. One thing can be said for certified coins, it serves to tighten the spreads quite a bit, especially when there are many active buyers within a specific series.

Common date MS-64 and 65 dollars were extremely active in PCGS holders. MS-64's were consistently bid at \$265 each, with the 1881-S at \$255. Until recently, most dealers qualified their dollar buy prices by listing the 1881-S dollar separately and at quite a bit less than the other common dollars. The consensus of opinion was that the 1881-S dollar was the most commonly graded in MS-64 and 65. This may be so, but the supply has been diminished by demand and most dealers are no longer afraid of having this date dumped on them. One would have to think that this issue has been spread out to the clients of PCGS dealers and others. In any case, the 1881-S is now approaching the other common dates and may be viewed as being on par with them.

Although price levels are mixed in the U.S. gold series, this area remains consistently active. We know why prices go up (someone is willing to pay more), but how can they go down and still continue

strong—simple. Some of the market makers could and did lower their buy prices feeling they would get just as many coins either way. This is more a matter of adjustments on their part rather than a weakening market.

One interesting note. There is at least one dealer who is offering to buy any coin in a PCGS holder at a minimum of \$11 each. This may seem low since the minimum grading cost is \$22 plus shipping, but it does place a minimum value on a coin which may not have made the hoped for higher grade. For example, a 1963 Roosevelt dime which may have been graded for a MS-65 set, yet, only makes MS-64. It will have a value of at least \$11.00. Interesting!

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$21. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than seven graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 50 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red brown), full bands on Mercury dimes and full head on Standing Liberty quarters. PCGS has an established grading set for the major series.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

Coins which have negative comments on the certificate may not command bid levels.
NB Represents no bid at this time

PROOF GOLD TYPE COINS

[illegible]

EARLY GOLD TYPE COINS

If the coin you have will stand in for even one month without the type inscription and the CCDn bid is lower than the CDV it is a better coin.

Plus Signs Appear for PCGS Commems in MS-64 thru MS-66

Price levels appear to be behaving in a more steady manner at this time. Dealers are not adjusting their bid prices as dramatically as they were, which makes for less volatile price swings. But, a whip-saw type volatility may be somewhat characteristic of the certified coin market, especially PCGS graded coins with their sight unseen buys. Dealers could have high buys one week, then fill their orders, thus dropping their bids while sellers appear at lower asks. This could cause bid levels to swing drastically. However, with the volume of certified coins being spread among thousands and thousands of buyers, the likelihood of this occurring often is remote. Of course, if it does occur, it should only happen to the most common of issues.

Now that the market for certified coins appears to be settling down to a consistent trading rate (for many issues), it is time for plus and minus signs so subscribers can more easily track weekly bid changes. The largest number of changes this week can be found in the PCGS column for silver commemoratives in MS-64, 65, and 66. Plus signs are scattered along these columns as a few PCGS dealers and even other non-PCGS dealers feel certain issues are destined to higher levels. The main reason these dealers feel comfortable at current levels is that the mintages for most issues are so low compared to other series and undoubtedly, the majority of specimens within a specific issue will be on the lower end of the grading scale.

The silver dollar market appears very stable with only a few changes in ANACS MS-65 prices. The 1881-CC and 84-CC were offered at lower levels so bids fell slightly. Common date PCGS dollars jumped to \$590 bid in MS-65 except for the 1881-S which remained constant at \$555 bid. Many of the so-called common dates in MS-66 rose guardedly.

Type coins remained fairly steady in mint state and proof (all services) with slight weakness noted for the nickel types.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

U.S. gold remains very active at current levels with the bulk of changes found in the PCGS section. There has been no slowdown in activity monitored for any of the three grading services in this series.

In Walking Liberty half dollars activity occurs throughout MS-63, 64, and 65, but changes are centered around MS-63 issues from 1935-1947; generally to the upside.

There appears to be a general lowering of bid levels for PR-65 nickels and dimes, 1938-42.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$21. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than seven graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 50 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, and full head on Standing Liberty quarters. PCGS has an established grading set for the major series.

MS-63 Dollars, Walkers, Commems Top Want Lists

A major portion of the activity this past week was found to be in areas which have been ignored in the past. These are MS-63 coins, especially dollars, walkers, and commems and they are getting quite a bit of attention from several major dealers. The cause of this situation could be reasonable prices, the grading certificates, or the quality.

1. Reasonable Prices—In all cases, MS-63 coins are a fraction of MS-64 or 65 coins. The gaps widened between MS-63 and 65, so much so, that it was necessary to adopt the MS-64 grade. As these gaps or spreads open wider, some dealers begin to feel that 63's are a good deal in relation to the higher grades. In the case of dollars some common date MS-63's are only 12% of the MS-65 bids. With walkers, the spread is less, but still 63's are 20% to 30% of 65's. And the typical commem varies from 10% - 20% for the 63 to 65 ratio.

2. Grading Certificates—The grading certificates are a very good selling point to clients, who may or may not know how to grade. If any of the reputable grading services have been used, the accuracy of the MS-63 grade should be fairly consistent and interchangeable. In most cases, there should be little downside risk from current wholesale levels, especially since it costs about \$25 per coin to be certified. And since this cost has already been included in the value of the coin, so much the better.

3. Quality—MS-63 is an attractive coin. It is where one begins to differentiate between the number of bagmarks from MS-62 or lower to MS-63 and higher. Below MS-63 there may be too many marks to count, but at 63 and higher the distractions become less and less.

Lastly, a **certified 63** coin is usually a psychologically nicer coin because when it was sent to the certification service the owner probably felt that it may have been graded a little higher. (I don't know

anybody that sends in coins hoping to get lower grades.) Well, it may not be a 64 or 65, but many dealers are beginning to think that it may be just as profitable to sell ten \$100 MS-63 coins to a client, as it is to sell one \$1000 MS-65 coin.

U.S. gold continues to lead the market in bidding activity. There are numerous plus signs throughout the PCGS chart as the market-makers try to buy whatever becomes available. The problem most of them have is that their higher bids meet with very little success, especially in the MS-65 and higher grades. They could raise their buys all week long and still not locate enough to tip a balance scale.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$21. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than seven graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 50 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, and full head on Standing Liberty quarters. PCGS has an established grading set for the major series.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

Walkers Leading Market In Grades MS-63 and Better

For those of you who keep track of other dealers' buying lists it is obvious that the most actively sought series is Walking Liberty halves, graded by PCGS, in MS-63 all the way through MS-67. This week finds numerous plus signs for 1941 thru 1947—all mints. There are many different buyers who specialize in this series so that the higher bids are representative of several dealers across the country. The big increases in bids for many of the MS-66 and 67 issues are a direct result of the latest population listing for PCGS coins. (This population list is updated occasionally and runs a total of all the coins graded by PCGS for each issue and grade.) It comes as no surprise that the coins with the largest increases in bids are the very same ones that have been graded the least.

One other encouraging note, this series is active not just because dealers are buying, their clients are purchasing singles and even sets as they feel this series could continue upward. So, most dealers are not just buying for inventory, they have many avid collectors and investors putting this material away, for the future.

MS-65 Mercury dimes, 1916 thru 1931, are extremely active at higher levels. The coins can be PCGS, ANACS, or raw, but must be strictly graded. One of the major buyers of this series has been trying to fill want lists and customer needs for many months now and all he's created is more interest in the series, while locating very few coins. He has stepped up his efforts by raising his bids substantially, attempting to top any and all competition. Price increases are not limited to early dates as the 1934 to 1945 coins are also active, many at higher bids.

U.S. gold remains stable in all grades with some minor adjustments downward. This market continues strong, however, as minus signs represent corrections, not weakness. There are numerous buyers across the country still trying to buy coins from all three listed grading services. ANACS and NCI remain unchanged as bidders kept buys consistent. Sellers are usually somewhat over the bid levels.

Type coins are mixed with various plus and minus signs

throughout the mint state and proof columns. There is apparent weakness in three-cent nickels, shield nickels, and Liberty nickels, all in proof. The leading market makers have backed down on their bids and sellers have offered coins at bid or below.

MS-65 dollars have settled somewhat, for the common dates. The higher buyers have filled their needs so that, there remains a large group of bidders at the new reduced levels. MS-66 coins continue to increase as a number of dealers try to locate this elusive grade.

There are numerous plus signs along the MS-63 columns for ANACS and PCGS commems. Most dealers in this series try to buy at current bid levels, but then, some dealers have decided to step out and fill up their inventory boxes.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$21. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986 by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than seven graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 50 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red brown), full bands on Mercury dimes, and full head on Standing Liberty quarters. PCGS has an established grading set for the major series.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

Experiments have been carried out with very young children to measure spatial perception using simple drawings (Buckley, 1990). Initially all the children were in the control condition. All the experimental groups found this task difficult.

CCDN does not buy/sell coins whatsoever. CCDn does not recommend any particular coin to represent a "authentic" to the CCDn community. CCDn implements a "trustless" system.

[illegible]

MORGAN DOLLARS

Soft struck coins will not command bid levels where full strike normally does.
NB Represents no bid at this time

DO YOU KNOW HOW THE PRICING STRUCTURE VARIES ON CERTIFIED COINS? YOU CAN NOW!!!

The *Certified Coin Dealer newsletter*, published by the Coin Dealer Newsletter, introduces its newest price guide on wholesale levels of ANACS, NCI, and PCGS coins in various grades of Mint State and Proof.

The *CCDn* reports the highest known bids of actively traded coins, which have been certified by ANACS, NCI, and PCGS. At this time, the coins from these three grading services are the most widely traded.

The prices shown in the *CCDn* are based upon data from all major market makers in the certified coin segment. The publishers of the *CCDn* do not buy, sell or trade coins. In short, there are no persuasive forces that might distort the true market picture.

Since the early 1960's the "Coin Dealer Newsletter" has been America's #1 wholesale numismatic price guide. The same publishers now present America's premiere wholesale price guide for certified coins – a compilation of pricing data on all actively traded certified coins.

Subscribe today and get the most comprehensive price guide on the certified coin market.

Gem Mercury Dimes Once Again Lead Bidding Activity

Although much of the activity that is taking place in the current market is not readily apparent to many dealers and collectors/investors, there is a vast amount of business being done by various numismatic firms, large and small, with their clients. It seems that some wholesale dealers are being left out of much of the dealings because they are not aware of what the numismatic firms are selling to their clients. If they would concentrate on the materials that these companies need according to the many thousands of buy lists that we see each week, they would get into the mainstream of action. Of course, this isn't all that easy because many of the buys are for coins that are difficult to locate, let alone, at reasonable levels. Yet, many wholesalers are in complete touch with the market and just seem to have a knack for finding material that others need on an immediate basis.

Gem Mercury dimes (MS-65, no bands) are on several dealers' want lists, and with their new higher bids more and more coins are beginning to appear on the marketplace. Still, the early dates, 1916-1931, are not going to be so plentiful that one could buy all they want. Maybe some of the more common issues will be available in some quantities, but it would be difficult to load anybody up on these early issues. There is a whole run of plus signs (almost every issue) for 1916-1927 for ANACS and PCGS coins, while plus signs continue thru 1931 for PCGS. There is also a run of pluses for PCGS MS-66 dimes, 1934 to 1945.

Although many of the most common date Morgan dollars have increased in PCGS-65 and 66, a few dates have fallen in the MS-65 columns of all three services. The 1879-P, 80-P, 81-P, 82-P, and 84-P, all appear weaker this week. However, the plus signs far outnumber minuses in the PCGS columns as many dollar buyers are actively seeking most issues in MS-63 thru MS-66 and even MS-67's.

Changes are plentiful in the U.S. gold columns as buyers adjust

their bids—mostly to the downside for PCGS, mostly to the upside for ANACS. This, by no means, is an indication of superior strength to ANACS over PCGS graded coins. PCGS levels are higher and still trade more actively than ANACS. Some ANACS coins rose due to bidders increasing levels for those particular issues. Although several minus signs do appear under the PCGS columns, there remains constant activity in the U.S. gold market.

Walking Liberty half dollars remain strong at current levels for ANACS and at increased bids for many dates (1941-47) in PCGS-63 to 67. Common date PCGS-65's have moved forward to \$410 bid. PCGS-66's are up to \$675 minimum and 67's to \$875.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$21. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than seven graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 50 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, and full head on Standing Liberty quarters. PCGS has an established grading set for the major series

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

Get in on the Ground Floor

DELAWARE VALLEY COIN & STAMP CO. INC. WANTS TO HELP YOU GET IN ON THE GROUND FLOOR of a coin market that offers some of the most exciting possibilities that we've seen available to the buyer in a *long* time. These opportunities exist with coins that have been graded by the Professional Coin Grading Service (PCGS). PCGS's accurate grading and "sight unseen" bidding network means that you can now buy coins with more confidence than ever before. We're also very excited about the new *Certified Coin Dealer Newsletter* because you can now track the performance of PCGS coins much more easily than ever before. We've been observing the PCGS market very closely. In our opinion, all of the necessary components are there for the market to go from the ground floor all the way to the top!

If you agree with our observations and want to take advantage of the opportunities that exist in the market, we're ready to assist you in any way that we can. We will custom design a portfolio of PCGS coins to meet your own individual needs and goals. Here's a small sample of PCGS coins that we have available for sale:*

1885 Three Cent Nickel Proof 66 \$2,640	1889 Liberty Nickel Proof 64 \$1,200	1892 Barber Half MS 66 \$7,750
1940 Walking Half Proof 65 \$1,770	1921 Peace Dollar MS 64 \$1,500	1883 Trade Dollar Proof 64 \$5,400
1885-O Morgan Dollar MS 66 \$1,380	1903-S Morgan Dollar MS 64 \$5,280	1935 Connecticut Half MS 66 \$2,220
1936-PDS Texas Set MS 65 \$2,160	1901 \$10 Liberty MS 65 \$7,900	1910-D \$10 Indian MS 64 \$4,620

*Prices subject to change

Give us a call at 1-800-345-8188, if you are interested in these coins, as we expect them to sell very quickly. If you would like us to personally assemble a portfolio of PCGS coins for you, fill out the coupon below and mail it in as soon as possible. Get in on the ground floor!

A UNIQUE OFFER FROM DVCS:

Any client who purchases a PCGS portfolio of \$2,500 or more from us will receive the next 52 issues of the *Certified Coin Dealer Newsletter* (a \$99 value) with our compliments. This offer expires December 31, 1986.

Dear DVCS:

I WANT TO GET IN ON THE GROUND FLOOR!

- ☐ I wish to purchase a portfolio of PCGS coins. Enclosed is my check for [] \$2,500 [] \$5,000 [] _____ Please have Greg Rohan call me to discuss my personal portfolio.
- ☐ Please add my name to your PCGS mailing list.

Gold—Most Active Area Commems Attract New Players

This week's National Silver Dollar Convention, along with the various auctions taking place this month, will have a decided influence on the direction the market is headed. The majority of the market appears to be in the doldrums. But, the areas and grades that are active, whether they be at higher or lower levels, or even at current levels, seem to be doing well for those dealers and clients who are continuing to participate. For the numismatists who attended the Palm Beach Rare Coin Auction, in Atlanta, they found a variety of certified coins going under the hammer. The most noteworthy coin of the sale had to be a Matte Proof-67, 1912 \$10 Indian, which was graded by PCGS. This "little jewel" brought \$42,460 from an ecstatic Atlanta dealer. Other certified coins and prices are listed below.

Denomination	Grade	Service	Price
1871 3¢ Silver	MS-63	PCGS	\$ 523
1868 3¢ Nickel	MS-65/65	NCI	\$ 550
1850 Seated Dime	MS-63/63	ANACS	\$ 550
1883 Seated Dime	PR-65/65	NCI	\$1210
1911 Barber Half	PR-65/65	NCI	\$1320
1940 Walking Lib Half	PR-65/65	ANACS	\$1210
1940 Walking Lib Half	PR-67/67	ANACS	\$1623
1890-O Morgan Dollar	MS-64 P/L	PCGS	\$ 935
1916 McKinley \$	PR62	PCGS	\$5500

Commemoratives, inconspicuous of late, are beginning to gather steam again, especially in PCGS-63 thru 66. Price increases are extremely evident for MS-63 and 66 specimens as a majority of the issues are higher as a result of heavy bidding by various dealers in each category.

Bids have changed for a large number of issues in the Morgan Dollar columns. Some issues have become volatile on a weekly basis as bids fluctuate back and forth depending on dealer needs. The Carson City dollars appear to be the most volatile at this time, with changes in both directions. Obviously, some of the better date "O" mints are seldom graded in MS-63 and higher so dealers are safe raising their buy prices for these issues. "Safe" meaning they cannot be dumped on with several coins of

one date. Yet, many dealers are not concerned with having to buy too many of these particular issues, knowing full-well that they are few and far between.

Many adjustments have been made in the type market. A few of the rarer issues are higher, but, the majority of changes are to the downside. In these cases, the higher buyers have retreated their bids somewhat, thus, causing this current backsliding. Again, nickel coinage seems to be suffering from too much availability.

The gold columns continue to be the area that changes the most week after week. This seems to make sense, in that, there are more players across the country than in other areas. Thus, bidders can be filled quicker and will then have to lower their bids back down, in order to keep a proper balance of supply and demand.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$21. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than seven graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 50 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, and full head on Standing Liberty quarters. PCGS has an established grading set for the major series.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

[illegible]

MORGAN DOLLARS

Soft struck coins will not command bid level when full strike is noted.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate.
Previous years certificates will bring substantially less than bids.

EARLY GOLD TYPE COINS

If the coin you have will stand on its own merits and is not a "common" coin and the CCDn bid is lower than the CDN then it is a "common" coin.

We Want Your Select Quality PCGS Coins!

Top of our list to buy are the following:

U.S. Gold	MS-66, PR-66 and better
U.S. Type	MS-66, PR-66 and better
Silver Commemoratives	MS-66, PR-66 and better
Early (pre-'33) Walkers	MS-65 and better

Plus, we're buying all of the above series, and many others, in MS-64, PR-64 and better condition.

Help supply our current needs and our fast check will convince you that we're strong buyers of the right coin!

Pick up the phone and give us a call!

Active Eagles Cause Temporary Market Slowdown

This week's newsletter contains, by far, the largest number of adjustments since the inception of the CCDn. The plus signs are easy to explain as buyers are willing to pay more for specific issues in various grades. The minus signs are occurring for two reasons. First, sellers are willing to accept less than bid for their particular coins, usually the more frequently encountered issues. Second, the higher buyers have relaxed their bids to lower levels as more and more coins are being graded and put on the open market. At this time, there does appear to be a break away of rare coins from the common issues. As population figures become more readily available from PCGS members, it will become common knowledge as to which coins are the rarest in specific grades. As time goes on, the fewer the number of coins graded in a certain high grade, the more likelihood of its increasing in value.

By the way, it would sure be nice if ANACS and NCI would keep track and make available the number of specific dated coins in each grade that they certify. In the coming years the number of coins graded, if substantiated, will lend more credence to price support than just the mintage figures of the past.

Many dealers, at the National Silver Dollar Convention, were of the opinion that the market is going through a faze, whereas, dealers are selling slow moving material at lower levels so they can put their money to more active use in the bullion market—more specifically, American Eagles. The country is in a frenzy over gold Eagles and almost every coin dealer in the country is trying to satisfy this current demand. However, this is somewhat at the expense of the numismatic market which seems to be neglected for the time being. If gold continues to move lower, thus hurting the buying public, this situation could reverse itself quickly. Then, those dealers who have been stocking up at these lower levels will come out "smelling like a rose".

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

Numerous dealers across the country have dealt in ANACS graded coins for many years. With the changes in grading interpretations by the numismatic community since 1980, and the adoption of the eleven point grading scale by ANA, it makes sense that coins graded by ANACS in previous years will not have the same value as coins graded today. We have compiled a list of percentages by year of the prices the marketmakers will pay for ANACS graded coins. These are generalized percentages of CCDn bid prices.

Year	% of CCDn Bid	Year	% of CCDn Bid
1986 Papered	Bid	1982 Papered	40% of Bid
1985 Papered	Bid	1981 Papered	35% of Bid
1984 Papered	65% of Bid	1980 Papered	25% of Bid
1983 Papered	55% of Bid		

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$21. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 80 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown) full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has an established grading set for the major series

[illegible]

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate.
Previous years certificates will bring substantially less than bids.

All prices are dealer bids.
Prices are for the most common dates.

Coins which have negative comments on the certificate may not command bid levels.
NB Represents no bid at this time

PROOF GOLD TYPE COINS

[illegible]

EARLY GOLD TYPE COINS

If the coin you have will stand on its own merits without the grading service and the CCDn bid is lower than the CDN then refer to the "DN"

INVESTORS, TELEMARKETERS, FINANCIAL PLANNERS DEALERS, COLLECTORS

Please contact us for daily 2-way liquid markets on accurately graded PCGS coins. We have approximately 2500 coins in PCGS holders in inventory at the present time for immediate delivery.

Every PCGS coin is graded by a minimum of four of the world's top rare coin grading experts (and grade verified by a fifth expert). A minimum of three of these experts must agree on the grade of a coin before a grade is assigned by PCGS.

If you would like to receive our weekly buy/sell quotes, send us your name, address and telephone number. If you wish to buy or sell coins today, call us for our competitive quotes.

Unlike the other grading services, where their liability ends when they have graded the coin, PCGS guarantees the grade of each and every coin.

We are currently one of the 53 active dealers who must make a two way market. These dealers have combined numismatic experience of over 800 years and they've sold over 4 billion dollars worth of rare coins. Joel Rettew has been buying and selling Rare Coins since 1953 and is a major market maker in PCGS coins.

PCGS coins are accepted by some lenders as collateral without further appraisal or grading. Get in on the the ground floor with the designer coins of the 1990's.

We will be able to supply you with the new U.S. Gold Eagles at very competitive prices with immediate delivery.

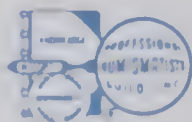

We've conveniently located with offices in Newport Beach and Palm Springs.

Commemoratives Brighten Lacklustre Market

Whether it's because of the approaching holidays or some other more valid reason or reasons, many dealers are relaxing their bids—in many cases, dropping them to much lower levels. It may also be a case of too much inventory or just wanting to stay in a cash position, but the higher buyers are beginning to change positions with each other as they take turns at lowering their bids.

In the Morgan and Peace dollar series, there are numerous changes, mostly to the downside for the more common dates in MS-62 thru MS-65. This may be a result of large quantities of coins now having been graded by PCGS and the market may be temporarily saturated. If this is the case, you can look for this to be a less than active buyer's market through the end of the year. You might also find the more difficult to locate issues increasing in value as dealers feel these are less likely to fall and will eventually outperform the common dates.

The U.S. gold columns would lead us to believe that the majority of dealers are more interested in building up their inventories in holiday merchandise, such as, bullion coins (gold and silver Eagles, etc.) and jewelry than they are in inventorying rare coins that may be slow for the next couple of months. This may be the chief reason for the widespread lowering of bids, not only in the gold issues, but in the other series which are showing weakness.

Silver commems continue to be a bright spot as several issues are higher in MS-64 and better. Most likely, this is relative to the fact that the very low mintages of these issues makes it impossible for there to be a whole lot of the higher grade coins when one compares them to such issues as 1880-S and 81-S dollars.

Walking Liberty halves remain active, although the majority of MS-64's, in PCGS holders are lower somewhat (1934-47). There is a broad base of dealers participating in this market, which has caused

the recent runup. It is only natural for a slight correction to occur. The next few weeks will determine how much of a correction takes place.

Type coins continue to adjust, mostly downwards, as dealers adjust their buy prices. As more coins are sold into the marketplace, if they are not sold to long term clients, they will trade from dealer to dealer and they will eventually seek a compatible level. In the beginning, buyers of PCGS coins were not very concerned with how high their bids were because they knew there were not many coins graded. Now, dealers have to be more careful and knowledgeable concerning specific issues before they put their bids on the line.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$21. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 80 authorized PCGS dealers who will send in coins for grading. These dealers and many more who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown) full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars. PCGS has an established grading set for the major series.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation" and "strike".

Consequently, any software or CCDn that is not non-faulty will be drawn and processed as if it were a fault. The CCDn neverthless CCD implies that a few (very

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate
Previous years certificates will bring substantially less than bids.

Gem Mercuries Higher Gold Continues To Adjust

Generally speaking, bid levels are lower "across the board." The main cause of this downward trend appears to be profit-taking; along with the fact that most dealers have lowered their buy prices. Upon further examination, one can see that the larger the number of coins which receive grading certificates, the more coins are on the market and need to be sold. This is a two cycle event: First, coins are taken off the market while they are sent to grading services, thus, causing a shortage—prices go up. As soon as the coins have been graded, quantities are available—prices go down. Very simplistic theory, yet, basic supply/demand reactions.

The majority of dealers are not limitless banks. So, to avoid building up their inventories too high in certain areas, they have lowered their buy prices. This, of course, gives the appearance of a weak market, which, may not be completely true for all series because coins are still actively being traded, but, at lower levels.

In past years, lower prices usually meant that coins were not trading in that particular series. Now, mainly because of PCGS, if a member of PCGS has a buy price, he must honor his buy, sight unseen, or be subject to penalties imposed by PCGS. The sight unseen aspect is the main reason many bid levels have dropped recently as dealers scramble to let others be the higher buyers on the more commonly graded coins, so they don't increase their inventories to too high a level.

Type coins are very mixed at this time. The majority of bids are higher for MS-66 coins, which, quite obviously, not many coins measure up to this level. When coins are found in this elusive grade, owners can usually name their own price. In grades MS (or Proof) 65 or less, one finds many changes. For the most part, minus signs represent the more common issues and plus signs designate somewhat rarer issues. The more coins that get graded and out into the marketplace, the more we will see a constant two-way market.

Gem Mercury dimes (1916-39) continue to be listed on several dealers' most wanted list. And, of course, the more persistent dealers are willing to pay in advance of bids. All of the plus signs creates a supply/demand problem as clients want to buy these elusive coins. Yet, they must stand in line and wait for their orders to be filled. Thus, more demand, shorter supplies.

Walking Liberty halves (1941-47) seem to increase in value for MS-66 and 67 each week. MS-65 and 64 coins appear to fluctuate on a weekly basis depending on the needs of various dealers. MS-67 1941-S Walkers are now bid at \$3500 each, with 1944-S coins wanted at \$2700 per. Most of the other dates range from \$1000 to \$1700 in MS-67.

ANACS

American Numismatic Association Certification Service: A non profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$21. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 80 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has an established grading set for the major series.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

CCD did not rely on any of the other CCDs, but rather, it is a particular type of CCD that is used to generate the other CCDs. The other CCDs are used to generate the final CCD, which is the one that is used to generate the final output.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate.
Previous years certificates will bring substantially less than bids.

We Want Your Select Quality PCGS Coins!

Top of our list to buy are the following:

U.S. Gold	MS-66, PR-66 and better
U.S. Type	MS-66, PR-66 and better
Silver Commemoratives	MS-66 and better
Early (pre-'33) Walkers	MS-65 and better

Plus, we're buying all of the above series, and many others, in MS-64, PR-64 and better condition.

Help supply our current needs and our fast check will convince you that we're strong buyers of the right coin!

Pick up the phone and give us a call!

MS-66 Coins Receiving Major Portion of Bidding

It appears that the majority of the dealers in the certified market are doing their best to buy coins which are the very top of the line on the grading scale. Many of the bids seen recently are for Proof and MS-66 and 67 coins, and even optimistically, 68's. It's obvious that not many coins will trade because there aren't many that fall into any of these categories. Yet, most dealers would be more than happy to buy what becomes available knowing full well that one day the spread between MS-65 and higher quality coins will intensify at least as much as the spread between MS-64 and MS-65.

The most actively sought MS-66 and better coins are Commemoratives, Silver Dollars, W.L. Halves, U.S. Gold, and Type. All of these areas have countless bidders with commems, dollars, and Walkers generally finding trades taking place. These three series will typically have more coins graded in the 66 and better grades. However, in these higher grades, coins do not change hands as many times as with coins of lesser quality. When a buyer purchases one of these rarities it is usually for a very good customer, that is, the coin doesn't keep trading on a wholesale basis, it is put away.

Commems appear to be fairly stable at today's levels, although, gold commems in MS-64 and 65 have a large number of adjustments. The higher buyers seem to be lowering their bids, thus, causing these downward moves. There are several consistent buyers of MS-63 commems (gold and silver) near bid levels with a few right at bid. In MS-64 thru 66's many buyers can be found at current levels with a few attempting to inch ahead of the competition.

Although the dollar market continues active, bid levels are generally lower for the non-rare dates. Dealers have lowered their buys across the board and sellers are more than willing to discount coins. The

base price for common Morgans has fallen to \$210 in MS-64 and \$490 in MS-65. MS-66 dollars remain active at current bids and in many cases, even higher, especially for the dates which are not frequently seen. For example: A couple of 1899-O (PCGS) dollars changed hands at \$1650 each, while a 1901-O (PCGS) brought \$2500.

MS-64 and 65 Peace dollars are receiving some strong head-to-head bidding competition. This is extremely good for sellers of this series, but not too many of the better dates receive these high grades. The only date which seems to be faltering somewhat is the 1934-S in MS-64 and lower grades, as dealers retreat their buys.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$21. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 80 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars.

MORGAN DOLLARSSoft struck coins will not command bid levels where full strike is normal

Happy Holidays! Last Issue of 1986

EDITOR'S NOTE

We would like to take this opportunity to wish everyone a safe and happy holiday. As this is our last issue of 1986, we wanted to thank all of our subscribers for helping make the CCDn a success in this, its first year. Our next issue will be dated January 2, 1987.

The certified rare coin market is being directed toward a stock market type approach. It presumes a lack of knowledge on the part of the investor, yet, the investor is usually one of better-than-average intelligence. The investor is seeking an alternative to other investments with a prospect of higher earnings. Yet, the investor who seeks to educate himself about rare coins will usually do better than one who relies strictly on the efforts of others. It seems that many new faces to the coin industry are seeking to learn about rare coins so they can take advantage of not only their dealers' expertise, but their own best decision-making abilities. However, learning takes time. It can be a slow process. But when these new investors feel comfortable, the certified market will become more active than ever!

The Twenty-Dollar Saint Gaudens is currently suffering from an over-supply. Specimens from all three grading services saw bids fall in MS-63, 64, and 65. This, in turn, has hurt some of the other issues in MS-63, but, for the most part, MS-64 and 65 coins remain stable, if not higher. The main problem with Saints seems to be that there has been a large number of coins graded by PCGS. One PCGS member reported that, as of October 14, 1986, 3406 MS-63's had been graded, 1705 MS-64's, and 400 MS-65's. And in the past two months these

numbers have increased substantially, thus, saturating the market. The resultant price drop may be unexpected, but is definitely understood. Many dealers feel this is a temporary situation, mostly because of the time of the year. However, others feel this situation may not change markedly until the investor is the major market, not other dealers.

Although bid levels have not changed much, the following areas of the certified market remain stable and active: Commems (gold and silver) MS-63 thru MS-66, Mercury dimes MS-64, 65, and 66, and Walking Liberty halves MS-63 thru MS-66.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$21. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986 by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 80 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

CCD image for the 200×200 pixel image. The data are given in Table 1. The CCD image for the 200×200 pixel image is given in Table 2. The CCD image for the 200×200 pixel image is given in Table 3.

GOLD COMMEMORATIVES

[illegible]

MORGAN DOLLARS

Soft struck coins will not command bid levels where full strike, naturally good.
NB Represents no bid at this time.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate.
Previous years certificates will bring substantially less than bids.

PCGS PLUS

Extra Service, No Extra Cost

Joel Rettew is an **Authorized** PCGS dealer and also a **Major Market Maker** in PCGS coins. Joel can offer you the **quickest, easiest, and economical way to have your coins graded by PCGS.**

1. **QUICKEST:** Our Newport Beach office is located only blocks from PCGS.
2. **EASIEST:** We have a full time staff member who devotes her time to writing up PCGS coins, hand delivering your coins to PCGS daily, and is always here to answer any questions you may have regarding the PCGS program. Call Shawna at 1-800-624-3022 (NA WATTS) or 714-833-1800 (CA).
3. **ECONOMICAL:** We will try to save you money by pre-screening any coins for what in our opinion may come back a **No Grade** from PCGS.

Simply enclose \$22 per coin. List each coin by Type, Date & Mint Mark, Denomination and Value.

Send your coins **TODAY** to Joel Rettew, for the **QUICKEST, EASIEST** and **ECONOMICAL** way to have your coins graded by PCGS.

Extra Service, No Extra Cost
